SOFTWARE ENGINEERING GRADUATE

Detail-oriented and motivated Software Engineering graduate with First Class Honours and hands-on experience in web application development, software testing, technical documentation and system enhancement within structured project environments. Experienced in requirement analysis, troubleshooting, debugging and collaborating with cross-functional teams to support project objectives. Strong analytical, problem-solving and communication skills developed through academic and industry projects. Eager to learn, adapt and contribute in a fast-paced technology environment while developing professional expertise in software development and IT services.

EDUCATIONS

Bachelor of Computer Science (Software Engineering) (Hons.)

September 2022 – September 2025

Universiti Tenaga Nasional (UNITEN)

- CGPA: 3.89

Foundation in Engineering and Technology

July 2021 – June 2022

Kolej MARA Kuala Nerang (KMKCN)

- CGPA: 3.87 | MUET: Band 4.0

CORE COMPETENCIES & TECHNICAL SKILLS

- **Frameworks & Programming:** Laravel, Bootstrap, PHP, JavaScript, HTML, CSS, SQL, Java, C++
- **Concepts:** Software Development Life Cycle (SDLC), Requirement Gathering & Analysis, System Design, OOP, MVC Architecture
- **Database:** MySQL, Oracle SQL, Relational Database Design, Data Analysis and Visualization
- **Software Testing:** System Testing, Functional Testing, User Acceptance Testing (UAT), Test Case Design, Troubleshooting, Debugging
- **Documentation:** Technical & Workflow Documentation, Report Preparation, Presentation Preparation, Research & Analysis
- **Tools & Technologies:** Git (GitHub / GitLab), Visual Studio Code, XAMPP / WAMP, phpMyAdmin, Figma, Tableau
- **Soft Skills:** Problem Solving, Analytical Thinking, Adaptability, Communication Skills, Team Collaboration, Time Management
- **Languages:** Bahasa Melayu (Native), English

ACHIEVEMENTS AND CERTIFICATE

Dean's List Award for All (6) Semesters

September 2022 – September 2025

- Universiti Tenaga Nasional (UNITEN)

Tertiary Education Sponsorship Programme (TESP) MARA

July 2021 – September 2025

- Granted scholarship to pursue foundation and undergraduate studies.

Certificate of CCNAv7: Introduction to Networks

June 2023

- Completed with practical skills in setting up, securing and troubleshooting basic networks.

WORK EXPERIENCE

TWO Q ALLIANCE SDN. BHD (Web Development Intern)

July 2024 – September 2024

- Contributed to the development of a government digitalization system, Projek Pendigitalan Sumber Operasi Hutan (PSOH) for Jabatan Perhutanan Semenanjung Malaysia (JPSM) to enhance system functionality and performance.
- Developed and enhanced Laravel-based web application modules using PHP, JavaScript, HTML, CSS and MySQL.
- Collaborated with teams to support system enhancement projects through requirement analysis and development tasks.
- Translated business requirements into functional technical implementations and supported solution design under senior guidance.
- Enhanced system functionality by improving existing modules and implementing new features using clean and structured code.
- Performed functional and integration testing including troubleshooting and debugging issues to improve system performance.
- Utilized GitLab for version control, collaboration and code management throughout development cycles.

PROJECTS

Final Year Project (FYP): Dr. Aquascope – An Integrated E-Commerce Ordering System

- Designed and developed a full-stack B2C e-commerce web application using Laravel (PHP), JavaScript, HTML, CSS and MySQL.
- Conducted research, requirement gathering, business analysis and system design based on user and operational needs.
- Implemented system functionalities including product management, ordering system, payment workflow and admin dashboard.
- Applied MVC architecture principles to support maintainable and structured system development by writing clean code.

- Designed relational database structures and managed data flow to ensure data integrity and system reliability.

University Project: SleepWell+ – Sleep Tracking Mobile Application

- Designed and developed a mobile application to help users track their sleep habits and improve sleep consistency.
- Implemented key features including sleep logging, automatic sleep duration calculation, sleep information and sleep reports.
- Developed a Sleep Habit Score to evaluate users' sleep consistency based on sleep duration and sleeping patterns.
- Built the application using .NET MAUI, Android Studio, XAML and Firebase focusing on usability and data management.
- Applied software engineering practices including requirements analysis, UI design, testing, debugging and documentation.

University Project: Research Grant Management System (RGMS)

- Designed and developed a web-based system to manage research grants, milestones and academician information.
- Implemented role-based access control for administrators and academicians to manage and access relevant information.
- Developed key features including grant management, milestone tracking, academician management and an admin dashboard.
- Developed the application using Laravel, PHP, JavaScript, HTML, CSS and MySQL by following the MVC architecture.
- Applied software engineering practices including requirements analysis, database design, testing, debugging and documentation.

LEADERSHIP & CO-CURRICULAR ACTIVITIES

1. Pembimbing Rakan Dinamik (PRD) – Student Mentor

- Mentored junior students by providing academic guidance, peer support and campus orientation.

2. BAKSIS Program – Committee Member

- Assisted in planning, coordinating, and executing programme activities.
- Collaborated with committee members to ensure smooth event operations.

3. UNITEN PRO-C – Active Member

- Participated in club activities and collaborative programmes to enhance teamwork and communication skills.

4. SULAM Community Project – Committee Member

"Wawasan Ilmu Teknologi bersama Anak-anak Yatim dan Asnaf As-Solihin"

- Planned and conducted a community outreach programme for orphans and underprivileged children.
- Coordinated educational and technology-related activities with the project team.

5. MBOT Tune Summit 2023 – Participant

- Attended technology and engineering talks to gain insights into emerging technologies and current industry trends.

6. Health & Fitness Programme – Committee Member

- Assisted in organizing Sports & Recreation Management at Work activities.
- Managed the BMI checkpoint and coordinated participant registration.

7. Pre-Innovation, Invention and Entrepreneurship Competition (IIEC) – Participant

- Collaborated with a team to develop innovative ideas and deliver project presentations during the competition.
